Extractor

Easily pull quality data from PDFs

Insurance organizations frequently send and receive data in Portable Document Format (PDF), which is a convenient way to compress information. The downside? Getting data out of a PDF has been a challenge until now. Dyad's Extractor is the right tool for insurance businesses to extract quality data from PDF and convert it into other commonly used formats.

Dyad's AI-based Extractor enables you to pull quality data from PDFs and convert it into other commonly used formats. With Extractor, your organization can extract PDF data and get it in JSON, XML, and Text data formats so you can populate it into other applications and save keystrokes.

Ways Extractor can help

Dyad's Extractor tool can be utilized to train documents such as ACORD forms, carrier supplements, MGAs' in-house application forms, and more. Once a document is trained, Extractor can pull out the data from the filled application and provide output in various formats, which ultimately improves the end user's efficiency.

Find out how **Extractor can make a difference** in putting the data your business needs **into the right formats**.

ABOUT US

Dyad delivers software and services that simplify insurance processing and distribution. We have redefined insurance technology by continuously improving our solutions, ensuring our customers can focus on growing and evolving their business, delivering superior customer service, and implementing insightful business management. Retail agencies, wholesalers, agency networks, program administrators, MGAs, and carriers benefit from our solutions.
